

Kassandra Campos

December 2019 Graduation
Double Major: Italian and
Cognitive Science

I was interested in pursuing an Italian Major because I had always wanted to learn another language. In the process, I discovered the beauty in the language, culture, and literature. After graduating, I went to live and work in Italy for a few months. Take all the classes they may be interested in and to learn as much as they can about everything. I would recommend an Italian Major to everyone that is interested in immersing themselves in the beauty of the Italian culture – of food, art, and literature. The experience was amazing! Now, I am a teacher in Northern California and my students love our occasional Italian lessons.
